SUMMARY

Full-Stack Engineer with 2+ years of commercial experience building production SaaS products with TypeScript, React/Next.js, Node.js, PostgreSQL, Redis, and BullMQ. Experienced in AI-native development, integrations, background processing, AI evaluation systems, and end-to-end product development. Daily user of Claude Code, Codex, Cursor, and Conductor for codebase analysis, implementation, testing, and agent-assisted development.

EXPERIENCE

Full-stack Developer

Sequenzy — 05/2026 - 10/2026 — Remote

- Built and shipped AI-powered email and landing-page workflows, including streaming assistants, prompt-first creation, block-level AI editing, grounded generation, and safety checks across campaigns, sequences, segments, and landing pages.
- Shipped product builders for landing pages, forms, and popups, including visual blocks, nested layouts, real-time previews, embeds, public renderers, and custom-domain support.
- Improved dashboard first-load performance by approximately 50% by lazy-loading tRPC routers, reducing blocking data fetches, fixing hydration/loading flicker, adding stable skeleton states, and improving mobile layouts.
- Added over 120 AI and regression evaluations covering email generation, landing-page generation, block-level editing, grounded generation, safety checks, and key product workflows.
- Implemented integrations and marketplace flows for Webflow, Wix, WooCommerce, Chargebee, Zapier, n8n, and Framer, working with OAuth, signed webhooks, background workers, API integrations, and setup flows.

Full-stack Developer

BlogToPin — 07/2025 - 10/2026 — Remote

- Developed a configurable Pinterest scheduling engine with variable daily pin counts, floating time offsets, timezone-aware scheduling, legacy configuration support, and a monthly schedule preview.
- Created and shipped a full-stack AI Writer module from scratch, including AI-assisted content generation, rich-text editing, WordPress synchronization, and Markdown export.
- Built a BullMQ based pin regeneration pipeline combining background jobs, AI image generation, and style analysis for automated pin recreation.
- Designed and shipped a Chrome MV3 extension, including AI-assisted pin generation, custom backend authentication, and browser automation for Pinterest workflows.

Frontend Developer

TOP IZ DATO — 07/2024 - 01/2025 — Remote

- Built 12 reusable and accessible React components for Course Garden using TypeScript and Tailwind CSS.
- Applied Feature-Sliced Design across 10+ modules to organize frontend features, shared UI, and application logic.
- Implemented routing and error-handling flows across 8 application routes.
- Delivered 6 production features as part of a 5-person cross-functional development and design team.

SKILLS

Frontend

TypeScript · React · Next.js · Tailwind CSS · Zustand · React Hook Form · Zod

Backend

Node.js · Express.js · tRPC · REST API · PostgreSQL · Redis · BullMQ

Integration

OAuth · Chargebee · Webflow · Wix · Zapier · N8N · Make

AI & Automation

Claude Code · Codex · Cursor · Conductor · Agentic Development · AI Evals · LLM Workflows · MCP

Testing & Quality

Playwright · Jest · E2E · Regression Testing

LANGUAGES

English — Advanced

Ukrainian — Native

EDUCATION

Master's Degree, Computer Science

National Technical University "Kharkiv Polytechnic Institute"

09/2025 - Present

Bachelor's degree, Computer Science

Харківський національний університет імені В. Н. Каразіна

01/2019 - 12/2023
